

MEDICA LABMED FORUM 2017

Hall 18, Stand 18 E08

Agenda and free exhibitor presentation slots

	Monday, 13. Nov. 2017	Tuesday, 14. Nov. 2017	Wednesday, 15. Nov. 2017	Thursday, 16. Nov. 2017
11:00	Opening	Opening: Hot topics in cardiac diagnostics	Opening: Hot topics in diabetology	Dangerous travel companions
	Hot topics in oncological diagnostics	Biomarkers for myocardial infarction and heart failure	The lab comes to (and into) the patient	What to do, if imported infections occur in EU?
	The issue of false positives: how useful is cancer screening?	Is high-sensitive enough - Quality issues in POCT diagnostics?	Advances in continuous glucose monitoring (CGM)	Multidrug-resistant tuberculosis and migration to Europe
	Liquid Biopsy: Can we diagnose cancer from blood?	Small patients, big challenges: How biomarkers can help	Clinical aspects of self-testing and CGM	The origins of the current MDR Gram-neg. bacteria in Germany?
	The role of tissue and blood analysis in cancer diagnostics and treatment	New hope for cardiac patients by stem cells	Quality management aspects of diabetes monitoring	What to do if imported infections occur in EU?
				HIV Home-testing: a WHO and BMG campaign
	Round Table Discussion	Round Table Discussion	Round Table Discussion	Round Table Discussion
13:00	Multi-target Serum MicroRNA Assays for Early Detection of Cancers and other diseases MIRXES	Free Industry Presentation Slot	Free Industry Presentation Slot	The IgG Quantitative Detection of All Five TORCH Markers - A Profound Significance to Eugenics. maccura
13:20	Free Industry Presentation Slot	Free Industry Presentation Slot	Rapid tests for the management of gluten-related disorders Biomedal	Free Industry Presentation Slot
13:40	Innovative assay formats for optimized molecular diagnostics: Digital RPA, LAMP and PCR using centrifugal step emulsification. Hahn-Schickard	Diagnostica in.vent Diagnostica GmbH	Enhancing diagnostic test quality through high-quality-sourcing of human Bio-Materials: the need to understand tropical disease pathology and epidemiology Pass Interscience GmbH	Free Industry Presentation Slot
14:00	Sequential screening: modern strategies for early diagnosis of cancer	Modern coagulation monitoring	From continuous glucose monitoring to the "artificial beta cell"	MDR tuberculosis - new data from Borstel, Germany
	Companion Diagnostics: established and new biomarkers for cancer therapy	Biomarkers in children with congenital heart defects	HbA1c: Analytical and clinical issues	MRSA and VRE in Germany and elsewhere
	New Classification of Cancers in the WHO-IARC: Chance to modernize diagnostics and therapies	Development of miRNA for cardiovascular diagnostic	Emerging technologies in point-of-care diagnostics	Detection tools for carbapenemase-producing Gram-negative bacteria
	Future perspectives	iPS: The bright future of regenerative cardiotherapy		ESBL and carbapenemase producing Gram-negative bacteria - current issues
		New perspectives of cardiovascular biomarkers		
		Final Discussion		

(Version: 10 November 2017, subject to changes)
