

Work With The Experts™

Extrusions | Catheters | Balloons | Sheath/Dilator Sets | Sutures/Fibers | Bioabsorbables

World-Class, Worldwide, End-To-End, Solution Provider

This Is Teleflex Medical OEM

IMAGINE IT, ACHIEVE IT®

Your idea has promise, but needs help to make it great. Teleflex Medical OEM is ready to help get your great idea off the drawing board and into the market. We have the vast capabilities, deep expertise, and decades of experience to deliver innovative product development and manufacturing services.

WE'RE READY TO HELP YOU SUCCEED

At Teleflex Medical OEM, you truly "work with the experts". With a mix of highly-qualified engineers, material and polymer experts, and skilled technicians, our team is multi-disciplinary to say the least. Whatever your project demands, we have a spectrum of outstanding talents to draw from. Our collaborative spirit will make our team seem like a natural extension of your own R&D department and operations staff. You can count on us to enhance your design, develop prototypes, and scale up for manufacturing.

Extrusions

- Global leader in PTFE, FEP, PEEK, and other fluoropolymers and thermoplastics
- Outstanding tolerance control, length accuracy, and concentricity
- PTFE liners (etching available)
- FEP IV tubing
- Single- and multi-lumen tubing
- Heat-shrink and spiral heat-shrink tubing
- Extrusion with ultra-small dimensions
- Custom colors and compounding
- Radiopaque fillers
- Multi-layer extrusion
- Microbore tubing
- Shapes and profiles

Catheters

- Diagnostic and interventional catheters customized from proximal end to distal tip
- Sizes 1.1F to 42F
- Broad selection of liner and jacket materials
- Reinforced shafts: braid, coil, and longitudinal wire
- Ultra-thin liners
- Multi-segment and multi-durometer shafts
- Hydrophilic coating
- Catheters with steerable, deflectable tips
- Custom handles for multi-directional devices
- Encapsulated and embedded marker bands
- Custom-configured tip and shaft segments
- Extensive finishing operations

Teleflex®
MEDICAL OEM

Balloons

- Customized balloons and balloon catheters
- Leading resource for balloons: non-compliant, semi-compliant, and compliant
- Your choice: standard balloon selection or custom engineered
- Catheters for a variety of procedures such as coronary, peripheral vascular, endovascular, endoscopic, and ENT
- Balloon tubing
- 0.014", 0.018", and 0.035" dilation and delivery systems
- Over-the-wire (OTW) and rapid exchange (RX) capabilities
- Balloon catheters for PTCA and PTA
- Stent delivery catheters

Sheath/Dilators

- We can provide everything for sheath/dilator sets from precision extrusion of components to device assembly and packaging
- Custom-engineered devices in a wide range of sizes and configurations
- Introducers with rotator lock technology
- Over-the-needle, peelable introducers
- Interlocking sheath/dilator assemblies
- Coaxial sheath/dilator introducers
- Introducer needles
- Epidural catheters and regional anesthesia catheters

Sutures/Fibers

- Teleflex Medical OEM is one of the world's few suture, braid, and fiber producers with the expertise to customize product performance
- We can take your project from resin to fiber to component to suture to finished device
- Extensive selection of absorbable and non-absorbable materials, sizes (USP and custom), PIC counts, patterns, colors, and coatings
- We are the source for Force Fiber® Suture (round), Force Fiber® OrthoTape® Braid (flat), and Force Fiber Fusion™ Suture (round-flat-round)
- Outstanding portfolio of sutures and braids constructed of PGA, PDO, UHMWPE, PET, nylon, and silk

Bioabsorbables

- Customized bioabsorbable sutures and yarns that meet your requirements for absorption rate, strength, flexibility, lubricity, and handling
- Bioabsorbable sutures: Bondek® Plus Suture and Monodek® Suture
- Resins: PGA, PLLA, and PGLA
- Yarns: PGA, PLLA, and PGLA
- Custom compounding with batch-to-batch, lot-to-lot consistency

Work With The Experts™

EVERYTHING FOR YOUR SUCCESS

- Product concept development
- Engineering
- Design for manufacturability
- Regulatory services
- Material selection and formulation
- Prototyping
- Testing and validation
- Production process development
- Custom tooling
- Manufacturing
- Finishing operations
- Assembly and packaging
- Private labeling

CUSTOMER SOLUTION CENTRES (CSCs)

Work smarter. Get your device to market faster. Contain costs. Our CSCs bring together industry experts and advanced technologies to accelerate concept development and innovation. You benefit from quick-turn concept development, data-driven decision making, and demonstrative prototypes.
