VISIOFOCUS® ●mini●

Together with Thermofocus and Visiofocus, **VISIOFOCUS ●mini●** is the most advanced thermometer a family or a doctor can own to precisely measure body temperature.

Totally hygienic, **without touching the skin**, **VISIOFOCUS ●mini●** projects the temperature directly on the forehead and on any other surface.

When you see the temperature in the middle of the two dots, the thermometer is at the right distance. Release the button, keep the thermometer steady while the projection flashes and read the temperature value.

	TOO FAR!	
	TOO CLOSE!	
	YES: CORRECT DISTANCE!
