

OKM IBS

Non-Invasive Neonatal Ventilator

It might be the world's most powerful and exquisite nCPAP.

- Apply to respiratory support required premature, neonate and child under 30 kg
- Fully electronic control of air-oxygen blending, one key setting, provide max 120s oxygen ventilation
- Pressure accuracy $\pm 2\%$, volume accuracy $\pm 5\%$
- Support low-volume ventilation, min volume: 0.5 L/Min
- Use Fisher & Paykel humidifier to improve the effect of warming and humidifying during mechanical ventilation
- Use Coanda-effect pressure generator, pressure monitoring near the nose, real-time leakage compensation to settle neonate's weak resilience
- User-friendly interface, 8" screen biggest in the field, comfortable visual effects and compliance with behavioral habits
- Air compressor noise level ≤ 50 db, meeting the demand of NICU

Non-Invasive Neonatal Ventilator

ITEM	OKM IBS	
Air and Oxygen Mixer Mode	Electronic	
Fresh gas Flow range	0L/min-40L/min	
Breath Type	NCPAP, NIPPV, SNIPPV, HFNC	
Display	Pressure-Time wave, Flow bar graph	
Monitoring Parameter	Pressure (Peak airway Pressure, Mean Pressure, PEEP, Airway Pressure), Oxygen concentration, Flow, Spon Rate, Expiratory Time, I:E	
Brake	Footbrake	
Tube Heating Mode	Heater Strip	
Screen	8 inch, TFT, Touchable	
Working Mode	Persistent Constant Current	
Fresh Air	O2, Atmosphere	
O2%	21%-100%	
Fast O2%	23%-100%	
nCPAP Mode	Airway Pressure	1 cmm H2O-13 cm H2O
	Manual Ventilation	3 cmm H2O-15 cm H2O
	Suffocation Awekeing	3 cmm H2O-15 cm H2O
	Suffocation Interval	Off, 10s-30s
NIPPV/SNIPPV	PEEP	1 cmm H2O-13 cm H2O
	Inspiratory Pressure	3 cmm H2O-15 cm H2O
	Respiration Rate	1bpm-120bpm
	ReserveFrequency	1bpm-120bpm
	Inspiratory Time	0.1s-15s
Leakage Compensation	Automatic	
Alarm Delay	1s-10s	
Fast O2 ventilation Persistent Period	30s, 60s, 90s, 120s	
Manual Ventilation persistent Period	1s-15s	
Air Source Pressure	0.28Mpa-0.6Mpa	

Catalog ID: OKM IBS 002-10-2017-ENG
