ORAL CLEANSING

ORAL GERM REDUCTION

ORAL WOUND CARE

Jack Pro[®] 24-36-48 h SET

What is the Expert Solution Oral Hygiene Concept?

With the Expert Solution Oral Hygiene Concept, ELISCHA provides a product system based on bioscience for oral cleaning, germ reduction and wound care among ventilated patients, tracheotomy patients as well as geriatric patients, care-dependent adults and children (including patients in intensive care medicine, oncology, radiation therapy, oral/maxillofacial surgery and patients with an immune deficiency) as well as diseases associated with periodontitis.

The Expert Solution Oral Hygiene Concept provides a permanently applicable, inexpensive product assortment for these patients. Application should be done according to the 3-step-system (further details on next pages).

PRODUCTS USED

Jack Pro[®] Gel plus

Oral hygiene gel for the care of the tongue, teeth, oral cavity and dentures

Jack Pro[®] Liquid plus

Cleansing and germ-reducing mouth rinse

APPLICATION

Instructions for
single patient use
3-step application of the
Oral Hygiene Concept[®] expert solution

APPLICATION

1

Jack Pro[®] Gel plus

Oral cleaning

Use 5 ml (pea-sized portion) of gel in the morning, evening and after meals to brush the teeth and clean the entire oral cavity and tongue. For tongue cleaning and the removal of pathological coatings simply use cotton or oral care sticks. If possible, do not rinse; spread remaining gel in the oral cavity and on the tongue. Natural dentition, implants and removable dentures can also be cleaned with the gel.

Application

1. Unscrew cap
2. Apply 5 ml of the gel by squeezing the bottle head on swap
3. Apply the gel to the oral cavity
4. Seal after use
5. Store dry at room temperature (1 month after opening)

APPLICATION

2

Jack Pro[®] Liquid plus

Oral germ reduction

Apply rinsing solution after oral cleaning or more often for inflammatory processes. Dosage approx. 5-7 ml to swab (e.g. with cotton stick or oral swab) the gums, buccal cavity and front part of the mouth for about 1-2 minutes. If possible do not rinse with water.

Application

1. Unscrew cap
2. Dosage 5-7 ml on swab
3. Apply the solution to the oral cavity
4. Seal after use
5. Store dry at room temperature (1 month after opening)

APPLICATION

3

Jack Pro[®] Gel plus

Oral wound care

After application of the mouth rinse, apply 5 ml (pea-sized portion) of gel to the oral cavity, tongue and mucous membranes. Apply several times a day in case of xerostomia (dry mouth) and inflammations such as mouth ulcer for moistening and anti-inflammatory measure. In case of a heavily coated tongue for tongue cleaning using cotton or oral swabs to carefully loosen and remove coatings.

Application

1. Unscrew cap
2. Apply 5 ml of the gel by squeezing the bottle head on swap
3. Apply the gel to the oral cavity
4. Seal after use
5. Store dry at room temperature (1 month after opening)
