

TempID is disposable or reusable smart-patch and mobile app solution that measures and records body temperature. "swipe readable" with mobile, usable as treatment diary and secure communication with doctor.

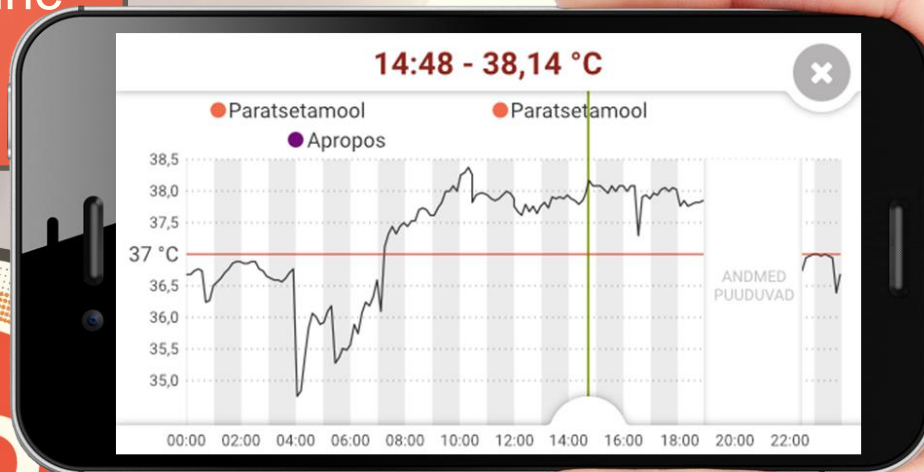

PROBLEMS

- Resource demanding and uncomfortable procedure to collect body temperature measurements from patients.
 - Unreliable methods to measure body temperature.
 - No-comfortable solution to analyze healing progress.
 - Missing disposable solution to collect body temperature readings.
 - Treatment cost due to poor or missing patient data.
- TempID reduces the resource to collect health data and treatment cost, increases the effectiveness of the health data monitoring and rise treatment diagnosis accuracy.

SOLUTION

- Flexible and soft sensor
- Latest NFC technology
- 1 year reusable for home users
- Disposable for hospitals.
- Mobile application.
- App functions:
chart, alarms, healing events and history, treatment diary, medicine effect, share with doctor.
- Consist patient ID
