

## hi-lo bath with unique *Lamborghini* style door

### PIRROEN

Multi purpose, fullsize bath; easy  
acces increasing independence.

This well designed hi/lo bath benefits from a large door, providing full access for the user, including non-ambulatory persons, wheelchair patients or persons that need to be transferred with a hoist. Access to the fullsize walk-in or *sit-in* bath is completely safe and comfortable. The entrance is electrically adjustable in height from only 27 cm to a height of 67 cm.

*Why choose for multiple baths, if you can serve all users with just 1 bath ?*

Today in many rehab facilities, hospitals and nursing homes you have to deal with a wide variety of patients; from fully ambulant, non-ambulatory persons, wheelchair patients or persons that need to be transferred with a patient lifter.

Thanks to its unique *Lamborghini* style door, the Pirroen hi/lo bath offers safe access to all and creates a safe working environment.

non-ambulatory

patientlifter

### *How it Works:*

By pushing the tip keys integrated in the bath rim, the Pirroen bath can be adjusted to the right position. Let the patient enter the bath, close the door and fill the bath. The door has a unique inflatable profile and is electronically locked during bathing.

Furthermore, this bath is available with bath shortener and shower stretcher, so that it can be used for a broad target group. The Pirroen bath 202 is a fullsize, freestanding assisted bath. Thanks to its fully flat lying area it feels just like a normal bath.
