Soda Lime

Potassium Free

Medical grade soda lime for closed anaesthesia circuits. (USP Grade)

Unique Particle Geometry (D-shaped)

- Effective shape for CO₂ absorption
- Larger surface area relative to volume
- Decreased reaction time resulting in high absorption levels
- Maximum consumption of soda lime
- Improved packing density

Low Dust

The dust content of P3 Soda Lime is minimal and, coupled with its standard hardness, ensures zero additional dust is produced during transport and handling. This reduces the risk of dust contamination and gas flow resistance during use.

	USP spec	P3 Soda Lime
Hardness	75%	95% typical
Dust	2% max	0.3%
Absorption (by weight)	19% min	25%
Humidity	12% & 19%	16%

Soda Lime Containers

TWIN PACK

- Supplied in cartons of two 4.5kg containers
- Includes sheet of 10 date-change labels

Code	Description
300301PHX	2 containers, white to violet
300302PHX	2 containers, pink to white
