

## Rough & Chappy Hand Prevention Spray

# Chappy Hand Guard

**NEW!**

With only spraying directly to hand, special film coats hands.

Spraying makes uniform application and then coating film strongly guards hands from rough & chappy ones.

Not being smart to wounds and usable with no feelings that something is wrong thanks to film.

Perfectly available to those who work outside or have sensitive hands that are apt to be rough or chappy hands.

Combination with hyaluron acid keeps hands fresh enough.

*Spraying prevents  
rough & chappy hands!*

Before this happens

With  
hyaluron  
acid

50ml
