

# › OPTOELECTRONICS

Depending on your technical requirements and your scheduled costs and quantities we design and develop (ZEMAX) the optical system as well as the hardware and mechanics around. Our research and development department is equipped with a modern optical lab.

High qualified employees guarantee high-end manufacturing of complex systems. The optic manufacturing is provided with dust and ESD safe areas.

## TYPICAL APPLICATIONS

- › Optics for beam shaping
- › Laser and LED modules
- › Fiber optical assemblies
- › CCD and CMOS camera modules
- › Scanning systems
- › Imaging and excitation systems
