

Strategically located across from McAllen, Texas our facility is a 15-minute drive across the border to Reynosa, Mexico. Reaching McAllen, Texas is done by flying into McAllen International Airport.

Getting to the facility is very convenient and does not have the same congestion experienced at other border locations such as Tijuana or Juarez. Our facility is located within 5-drive from the border crossing and within 10 minutes of an international airport on the Mexican side of the border.

- ISO 13485 & ISO 9001
- FDA Registered Facility
  
- 100+ person staff
- Facility is 4 years old
- 165,000 sq. foot facility
  
- Class 8 Cleanroom
- 6 Engel Injection Molding Machines
- 3 extruders capable of multi-lumen, multi-chamber, color striping, and cutting/coiling of tubing
  
- Sterilization is handled off-site within the U.S.
- Packaging & printing done per client specifications

The facility is operating at approximately 50% capacity with room for growth within the existing structure, and land outside for building a larger facility, as production increases.

Quality is maintained within ISO specifications and value is added by having injection molding, extrusion, and assembly done in-house.
