

Company Overview

CPC (Colder Products Company) is the leading provider of quick disconnect couplings, fittings and connectors for life sciences, specialty industrial and chemical handling markets. Used in a broad range of applications, CPC's innovative coupling and connection technologies allow flexible tubing to be quickly connected and disconnected. Founded in St. Paul, Minnesota in 1978, CPC is a leading global supplier of quick disconnect couplings with direct sales and distributor representation in North America, Europe, Asia, Australia and Latin America. CPC's Quality Management System is ISO 9001:2015 and 13485:2016 certified. CPC is a Dover company.

Applications

CPC's engineered, custom solutions help improve the overall functionality and design of the equipment and processes in which they are used. Special product features include precise hose barbs for excellent grip, built-in shutoff valves to prevent product spills and an easy-to-use, push-button thumb latch for quick connecting and disconnecting.

CPC's patented Hybrid Connector technology platform integrates electrical, fluid and gas lines into a single connection point. RFID-based IdentiQuik® couplings redefine what's possible for managing and streamlining fluid handling processes. IdentiQuik® technology allows the robust transfer of fluid and information to help identify device type or connected media, verify line connection accuracy or capture fluid and product data. Specific applications for CPC connection technologies include:

Life Sciences

- CPC's products are used across a broad range of medical devices and equipment, including surgical, dialysis, blood pressure monitoring, patient therapy devices, and in vitro diagnostics. A de facto standard in several applications, CPC connectors can help improve medical equipment usability. Many medical device OEMs around the world choose CPC connectors because of our proven performance in operating rooms, life science labs and home healthcare settings.

- CPC is the leader in single-use connection technology for bioprocessing applications, with a wide variety of solutions including sterile connects and sterile disconnects. Our innovative designs offer the flexibility to easily combine multiple components and systems including process containers, tubing manifolds, transfer lines, bioreactors and other bioprocess equipment. CPC's robust connectors help maintain media sterility and integrity with the additional aims of helping improve production yields, reducing costs and decreasing time to market for biopharmaceutical manufacturers. Specialty connectors also facilitate sterile connect and disconnect capabilities in non-sterile environments.

Specialty Industrial

- CPC's couplings and fittings are installed in thousands of product applications. Our broad offering appeals to product manufacturers in a wide range of industrial and consumer-based markets including analytical instrumentation, printing and ink management, engine systems, biohazard detection equipment, electronic cooling and portable hydration systems.

Chemical Handling

- CPC's extensive options for chemically resistant quick disconnect fittings, closures, couplings, and chemical dispensing systems support non-spill operation. Applications include semiconductor, LCD, solar, pharmaceutical manufacturing and chemical management, pump, filter and de-ionized water connections, cleaning, soap and detergent dispensing, bulk ink management and consumer-based applications.

Engineered Solutions Worldwide

CPC innovates and collaborates to produce custom and standard products. Many of CPC's standard couplings and fittings began as custom engineered solutions that found broader use in applicable markets. CPC delivers advanced product design and quality with local engineering support in the United States, Europe and Asia. To date, CPC has produced more than 10,000 custom and standard products to meet the fluid handling challenges of various industries worldwide.

We inspire confidence at every point of connection.
