

Biomedical

Dexter is the recognized leader in magnetic solutions for medical uses.

Our 16+ years of experience serving the medical market gives us deep knowledge needed to understand the highly specialized requirements manufacturers face in gaining FDA or CE approval. We also are the premier provider of permanent magnets for cell separation, ventricle assist devices (VADs), pacemakers, implantable valves, Cochlear implant and proton therapy, MRIs, lasers, as well as many other class 1, 2 and 3 medical solutions.

Our knowledge of magnet performance in extreme conditions and magnet compatibility helps you ensure a solution that meets the most stringent requirements.

Our dedicated teams work with you throughout your entire project, helping you define needs, validating system specifications and manufacturing optimized solutions. Our goal is to enable you to take technology farther, success higher and health care to the next level.

About Dexter

A global leader in the specification, design and fabrication of magnetic products and assemblies.

Since its founding in 1951, solutions designed by Dexter have and continue to positively impact our world daily.
