

MEMBER OF THE NYNOMIC GROUP

A selection of our OEM components as a basis for fast and efficient product development

### Separation of blood sample tubes with our step conveyor

Bulk loading of blood sample tubes is the origin of m-u-t's competence in laboratory automation. Many hundreds of large laboratories worldwide use various devices with our proven, reliable and patented step conveyor. The current version of the step conveyor offers the following advantages:

- Fast separation of up to 3,500 tubes per hour
- Teflon coated - also tubes with rubber caps can be processed without restrictions
- Optimized angles in the hopper area - even the last tube in the hopper will be processed safely
- A mechanical construction that makes injuries impossible
- Easy to clean if a tube is not properly closed

m-u-t has developed this step conveyor as an OEM module. We are happy to help you integrate our modules into your system or develop and manufacture your product as an OEM partner.
