

SP Medical A/S

Company Profile

Introduction:

SP Medical is a Danish company with more than 30 years' experience and know-how in the field of development, manufacturing and sales of guide wires for the medical industry. Over the past 30 years we have built up our know-how of PTFE coated semi-products and medical devices for leading suppliers of for example guide wires on an OEM basis.

It is SP Medical's goal to offer our customers a complete guide wire programme of high quality and, if required, of special features

Vision:

- SP Medical develops, manufactures and distributes disposable items such as guide wires to the hospital sector focusing on minimally invasive procedures in the field of cardiology, radiology and urology.
- Moreover SP Medical contributes to the manufacturing of other companies' medical devices, primarily by applying coating to improve functionality.

Policy

- SP Medical's high quality product programme is currently being enlarged with customized special articles by means of structured product development programmes combined with development of both process and machinery construction
- SP Medical's articles are manufactured in controlled hygienic environment by a trained staff. The manufacturing is performed with the greatest possible extend of automation to achieve both conform and good quality at competitive prices
- SP Medical's articles are sold and marketed either in bulk or single-packed as OEM articles to manufacturers of medical devices or sterile and single-packed for distribution through our international distributor's network.

Markets:

Approximately 30 years ago Acccoat Medical launched their first PTFE coated guide wire components on the Danish market.

Today our products are being supplied worldwide.

Company history:

In 1969 Acccoat A/S was established by Mr Preben Joergensen. The company quickly found its role as a sub supplier to large manufacturers in the medical industry. Coating of components with PTFE for guide wires quickly became the main activity. Our purpose was to facilitate the leading-in of guide wires into the blood vessels.

In April 1999 Acccoat A/S acquired a competitive company which since 1974 had been focusing on the manufacturing of different guide wire components such as ground inner cores, stylets, coils and dispensers.

In 1989 the company started its own manufacturing of guide wires to be sold on an OEM basis . As from June 2000 all medico activities were gathered under the Acccoat Medical division and at the same time sterile CE-marked and Acccoat branded guide wires were launched.

1. January 2007 Acccoat Medical changed name to SP Medical A/S and are selling Guide Wires under the Brand names: **Acccoat™ Guide Wires, Poseidon™ Hydrophilic Nitinol Guide Wires and Champion™ PTCA Guide Wires.**

Ownership:

SP Medical is a company with approximately 450 employees and a part of the SP Group, an International plastic group headquartered in Denmark. SP Group is listed on OMX the Nordic Exchange Copenhagen.
