

Our R&D system to scale up your solution

Motion system

- PU conveyer belt
- max. weight 50 kg
- up to 5 m/min

Max substrate thickness: **9 cm**

Total floor space: **2,5 m²**

Integrated MPG Software

- ✓ Data tracking and collection
- ✓ Statistical process control for QC
- ✓ Remote Diagnostics

Precursor supply

- Gas flow controlled, nanometric droplets
- Ultra quick change-over

Range of precursors

- Gases, liquids, mix of liquids, solutions, dispersions, etc.

Width: **200-300-400 mm**

Power: **500 to 1600 W**

Frequency: **ca 50 kHz**

Gas flow: **80-750 slm**

Plasma gas types

- N₂, Ar, He, air, CO₂ mixtures and more
