Totalfuser

Innofuser Series

Perfect infusion pump™ with enhanced convenience

Totalfuser

Introduction

- Totalfuser is a disposable inflatable pump with integrated flow regulator that allows flexible programming.
- It can be applied to the pain protocol of all environments by selecting flow rate and PCA option environment.
- Because of the revolutionary rolling method and gear, the flow rate can be adjusted more precisely.
- Facilitate local anesthesia pain management (increase patient mobility, speed up recovery, reduce re-entry, decrease drug use, decrease infection rate, improve patient satisfaction)

How to control

You can adjust the flow rate by turning the roller in 8 steps and keeping it in the direction indicated by the arrow. The provided Totalfuser key serves as a helper and can be separated and managed by the medical staff.

Safety key

Totalfuser® is a key that acts as a steering wheel. It controls the flow rate and provides control and separation functions for safer management.

Totalfuser	
Type	Continuous model
Volume Size	60ml, 100ml, 300ml
Flow Rate	1ml/h ~ 10.0ml/h

**This model can control the flow rate in 8 steps.
Because it is a fixed device, it can be used more safely.**
