

## Tripods for long infusions of SHDV and SHDV-P

Stationary tripods for continuous infusions SHDV and SHDV-P are designed for mounting and fixing containers for the transfusion of drugs and disposable systems. The frame of tripod is made of metal profile and painted with white powder paint. Basket for infusion solutions consists of two bottle holders and two hangers for intravenous infusion systems. Basket moves along the outer part of aluminum tube.

A tripod SHDV is mounted on a stationary crossbar.

A tripod SHDV-P is mounted on a crossbar with four wheels.

The design of the tripod has no protruding or sharp parts; it provides injury prevention during operation.

**Overall dimensions SHDV, mm: (l\*d\*h) - 630\*630\*1800**

**Overall dimensions SHDV-P, mm: (l\*d\*h) - 630\*630\*1900**

## Tripods for continuous infusions SHDV-E and SHDV-E5

Tripods for continuous infusions SHDV-E and SHDV-E5 are designed for mounting and fixing containers for the transfusion of drugs and disposable systems. The frame of tripod is made of metal profile and painted with white powder paint. Basket for infusion solutions consists of two hooks for intravenous infusion systems and two independent hangers for bottles with infusion solutions. Basket is regulated by the telescopic mechanism.

Tripod SHDV-E is mounted on a crossbar with three wheels.

Tripod SHDV-E5 is mounted on a crossbar with five wheels.

The design of the tripod has no protruding or sharp parts; it provides injury prevention during operation.

**Overall dimensions, mm: (l\*d\*h) - 630\*630\*1200-2000**

## Tripod for continuous infusions universal SHDV-U

Universal tripod for continuous infusions SHDV-U is designed for mounting and fixing containers for the transfusion of drugs and disposable systems. The frame of tripod is made of metal profile and painted with white powder paint. Basket for infusion solutions consists of two bottle holders and two hangers for intravenous infusion systems. Basket is not height adjustable. A tripod is mounted on a stationary crossbar.

**Overall dimensions, mm: (l\*d\*h) - 480\*480\*1820**

## Support for long injections of SHDV-1

The main advantage of the tripod for long-term infusions SHDV-1 is designed for installation and fastening of containers for transfusion of drugs and disposable systems. Tripod frames are made of stainless steel. The basket for infusion solutions consists of two hooks for intravenous infusion systems and two independent suspensions for bottles with infusion solutions. The basket is regulated by a telescopic mechanism. The support SHDV-1 is installed on the square basis on wheels. The design of the tripod allows you to perfectly store one tripod in another, which greatly improves their storage space.

**Overall dimensions, mm: (l\*d\*h) - 630\*630\*1200-2000**
