

Cenefōm

Ophthalmic Series

Cenefōm provides a complete line of professional and reliable products for fluid control and the safe cleaning of patients and fine microsurgical instruments during medical procedures in the field of ophthalmology. Lint and fiber-free, Cenefōm PVA sponge products are gamma radiated and packaged germ-free in cleanroom facilities. Sterility is guaranteed until the package is opened. All Cenefōm PVA products meet the highest medical performance standards and are fully CE certified.

Cenefōm PVA Products for Ophthalmology:

- Eye Spears
- Eye Drains and Eye Wicks
- Wipe and Wick Instrument Wipes and Cleaning Blocks
- LASIK Rings, LASIK Eye Drains, and Corneal Light Shields

Ophthalmic Series

OP-ES01 / OP-ES02 / OP-ES06

Cenefōm PVA Eye Spears

Cenefōm PVA Eye Spears are constructed of soft, absorbent and highly retentive polyvinyl alcohol foam. The porosity is controlled for a variety of applications including LASIK and cataract surgery. Cenefōm Eye Spears, gentle on the eyeball and cornea, are designed to quickly clean the surface of the eye and absorb diffuse fluids during ophthalmic procedures.

Fluid Absorption:
Before/After

Eye Spears

Model No#	OP-ES01	OP-ES02	OP-ES06
Dimension	8mm x 17mm	8mm x 17mm	8mm x 17mm
Packaging	5 pcs/foil bag 2 foils bags/pack 20 packs/box	5 pcs/foil bag 80 packs/box	5 pcs/foil bag 1 foils bags/pack 40 packs/box

OP-ED01/OP-ED02 • OP-EW01

Cenefōm Eye Drains and Eye Wicks

Cenefōm eye drains include a fluid collection bag with a PVA eye wick. Eye drains collect and retain excess fluids preventing them from entering the surgical site. The back of the fluid collection bag includes a convenient adhesive strip to ensure proper placement. The wick can easily be trimmed to fit any patient's required size.

Eye Drains

Eye Wicks

Model No# OP-ED01 / OP-ED02
Dimension 80CC / 400CC
Packaging 1pc/pack; 10 packs/box

Model No# OP-EW01
Dimension 3mm × 200mm × 2mm
Packaging 1pc/pack; 20 packs/box

Cenefōm Wipe and Wick, Instrument Wipes and Cleaning Blocks

Cenefōm instrument wipes and cleaning blocks are designed to remove particles and microscopic debris. The Cenefōm Wipe and Wick is a wipe with an attached eye wick that can be easily removed. For fluid control and cleaning microsurgical instruments, these products are made of a highly absorbent, fast wicking, lint-free PVA material and will not harm sensitive instruments or optical sites.

Cenefōm LASIK Rings, LASIK Eye Drains, and Corneal Light Shields

After the microkeratome dissection, a LASIK ring is placed on the eye before the flap is reflected. It absorbs and prevents excess fluid and blood from encroaching into the surgical site. Cenefōm LASIK Rings also minimize the risk of under-correction and the contamination of the stromal bed with fluid from fornices.

LASIK eye drains allow for the simultaneous absorption of excess fluid and protection of flap and hinge .

Corneal light shields keep the cornea moist, protect the retina from potentially harmful light during ophthalmic procedures, and enhance probability and speed of full recovery after surgery.
