Continuous Passive Motion

CPM(Continuos Passive Motion), CPS-2000 is a device for rehabilitation after knee surgical operation.

### Features

- Easy to operate with remote controller
- Preset used program AUTO save
- Can check current operating angle
- Can change speed and joint exercise range during operation
- Various operational functions for effective of joint exercise
- Easy to move and maintenance

### CPM, CPS-2000

### Specifications

Item	Specification
Main power	90~250[VAC]/50~60Hz
Power consumption	40VA
Width	34cm
Length	107cm
Weight	18kg
Knee joint moving angle range	-10 ° ~ 140 °
Femur length control extent	28 ~ 46cm
Tibia length control extent	37 ~ 54cm
Speed	150 ~ 230 ° / Min
