Hydrosun operates a full quality management system and is certified according to DIN EN ISO 13485. Hydrosun's clear core expertise is water-filtered infrared A = wIRA. Hydrosun Medizintechnik was founded in 1994 for the manufacture and trade of wIRA-therapy devices.

Penetration depth of infrared and advantages of wIRA:

Infrared-B and infrared-C remain in the upper layers of the skin and can lead to rapid overheating. wIRA transports the energy deeper into the tissue without stressing the skin surface. This results in a high therapeutically usable energy.
