

Periop Insight

Periop Insight is a data analytics solution for today's busy perioperative leaders to improve their OR performance. Periop Insight eliminates the hard, endless work of getting the information you need to run your OR, giving you the tools to make better decisions, share your insights and engage surgeons and administrators.

- ✓ Specialized data warehouse
- ✓ 20 curated measures
- ✓ Powerful calculation engine
- ✓ Actionable visualizations
- ✓ Designed for clinicians

Periop Insight provides:

Actionable Results

Use Periop Insight's powerful data analytics and reporting solution to drive data-focused improvements using trusted and nightly audited data.

Enterprise Reporting

Periop Insight provides an enterprise data analytics and reporting solution to drive actionable, meaningful initiatives across your entire health system.

Automated Reporting

Periop Insight generates personalized reports to keep surgeons and administration informed and engaged. Show up to meetings prepared with thoughtfully-designed, perfectly formatted materials without lifting a finger.

Cleaner Data

All data runs through an automated, nightly audit and validation. Better access to clean, actionable data gives stakeholders the tools needed to drive better data documentation and OR improvements.

Benchmarking

Periop Insight's benchmarking component enables comparison of performance against others in our industry-leading database of 7 million cases across a range of key measures.

Supply & Implant Cost

Gain insights into actual supply and implant usage data as well as internal comparisons to drive cost standardization across your surgeons, specialties, and procedures.
