**DOLCE-PHARM**

Leader in the Manufacture of Medical Products in Kazakhstan

Products for Obstetrics and Gynaecology

## Underwear Sets for Women in Labour

Underwear sets for women in labour are comfortable solutions that assist the delivery procedure. Optimally selected set of obstetrical kits ensures the maximum level of comfort for women in labour. Products made of 100% polypropylene nonwoven lint-free material permitted for use in medicine are not toxic and antistatic, do not provoke allergic reactions; the products also have a good air permeability and dustproof properties, high water and blood repellent properties, they ensure the protection against hospital-acquired infections.

Obstetrical kits are the kits of underwear and wear for women in labour ensuring the pre-natal and delivery process care. Comfortable composition of kits was approved by many treatment facilities.

## Gynaecological Kits

Sterile single-use gynaecological kit for examinations and sampling. Specially designed model of gynaecological speculum with elongated handle facilitates the work of doctors during examinations and procedures. The constructive changes of speculum resulted in the enlarged eyeglass lumen and maximum opening of instrument shutters. Rack-and-pinion mechanism safely fixes the required speculum opening. All-purpose Ayre spatula, small curettes, and double-sided guide are designed for material sampling during cell smear procedure.

## Cusco Vaginal Speculum

Single-use Cusco vaginal speculum is used in gynaecological, obstetrical, genitourinary examinations

rooms of different medical and preventive treatment facilities. Cusco speculum allows providing examinations of cervix, in particular its outer part and performing sampling for testing and some other manipulations.

## Ayre Spatula

Ayre spatula is a single-use instrument made of polystyrene designed as a handle with two spatulas of different shape at the opposite ends of the instrument. The instrument is designed for the sampling of cervix surface and lower third of cervical canal. Depending on the anatomic features of cervix it is possible to use wider or narrower part of spatula. The instrument is supplied sterile and ready for use.

## Small Curette

Small curette is a single use instrument designed as a handle with two operating parts shaped as curette spoons at the opposite ends of the instrument. This instrument

helps to simultaneously sample the material from cervix surface or from cervical canal. Scrape is also possible with the use of small curette. The instrument is supplied sterile and ready for use.
