Color Code	Sizes
16G 	1.77" 45mm
18G 	1.16" 29mm
20G 	1.16" 29mm
22G 	1" 25mm
24G 	0.75" 19mm

Extra needle cut (Back cut)

Extra needle cut from the back side makes less pain with comfort insertion

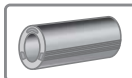

They do not snap easily

MF CATH PRO is made out of special urethane which is flexible and resilient

Radiopaque stripes

If catheter remains in the vessel, an X-ray scan is necessary to find it. MF CATH PRO's inner side of the tube has radiopaque stripes that make it easier to detect the catheter

Blood-Stopping Aid System

Blood-stopping aid system prevents any blood back flowing before next connection
