

Dual finebeam

Q-Switched & Long-Pulsed Nd:YAG Laser

All in One

Dual Nd:YAG Laser

Quality Pulse Technology

More Uniform Beam

Stronger Power Supply

Easier Operating System

For Your Shiny Life

Dual Nd:YAG Laser System for All the Functions

Finebeam Dual is an more advanced Nd:YAG laser system based on quality pulse technology. There are 2 different functional modes such as q-switched and long-pulsed with same zoom handpiece. This is the best solution for both skin rejuvenation and body treatments.

1 All in One System

Convenient & Economical to Treat for All the Area on Face & Body with Dual Q-Switched & Long-Pulsed Functions

2 More Uniform Beam

Flat Top-Hat Beam Profile for More Precise Beam Pattern with Max.10mm Beam Size

3 Longer Lasting System

Articulated Arm with 7 Coated Reflectors based on Advanced Power Technology for Quality Pulse of High Energy up to 60J

Treatment Effects

- Melasma & PIH Improvement
- Nevus of Ota & ABNOM Removal
- Soft Peeling
- Tattoo Removal
- Freckle, Lentigines, Café-au-lait Spot, Becker's-Nevus, Age spot Improvement
- Genesis
- Skin Tightening & Lifting
- Acne Erythema Improvement
- Telangiectasia
- Hair Removal

Technical Specifications

- Wavelength: 1064nm / 532nm
- System: Dual Nd:YAG Laser
- Mode: QSW (Q-Switched) / LPS (Long-Pulsed)
- Pulse Duration: QSW <10ns / LPS 0.3~300ms
- Pulse Energy: QSW 1064nm Single Max. 1.6J
QSW PDP Max. 2.2J
QSW Non-Q Max. 3.5J
QSW 532nm Single Max. 0.5J
LPS Max. 60J
- Frequency: 1~10 Hz
- Spot Size: Zoom Collimation
1064nm 2~10mm / 532nm 1~7mm
Fractional DOE 1064nm 5x5mm² (Optional)
Fractional MLA 1064nm 10mm (Optional)
- Optional Handpiece: Fractional 532nm / 595nm / 650nm
- Cooling System: Water to Air Heat Exchanger
- Electrical: 100~240V, 50/60Hz
- Dimension: 320(W) x 850(L) x 800(H) mm
- Weight: 80kg (Max. Weight: 90kg)
