ROBERTAZZI DESIGN NASOPHARYNGEAL AIRWAYS (Latex)

The original "Blue Latex Nasopharyngeal Tubes" have been improved through a unique manufacturing process. All nine sizes are treated to provide an extremely smooth surface to accommodate the patient's comfort and easing of insertion and removal.

Features:

- Sterile
- Best quality
- Accurate sizing of airway
- Flexible & resilient
- Disposable
- Smooth surface for easy insertion
- Soft (to reduce trauma to nasal passage)
- Processed to reduce protein
- Resists collapse or kinking

Part No	ID (mm)	OD (mm)	Length (mm)	Box
NS-20FR-BR-DT	3.9	6.7	114	10
NS-22FR-BR-DT	4.8	7.3	114	10

OHIO TYPE FLAT BREATHING BAG (Latex Free)

Lightweight flat breathing bag that is fabricated from the finest genuine neoprene material. It is individually inspected and packaged, assuring optimum sensitivity to patient's breathing.

Features:

- Consistent quality
- Flexible & versatile
- Exceptional grip
- Auto clavable
- Completed with 22mm bushing

Part No
BB-500CC-ZR-DT
BB-1L-ZR-DT
BB-1.5L-ZR-DT
BB-2L-ZR-DT
BB-3L-ZR-DT
BB-4L-ZR-DT
BB-5L-ZR-DT

2 AND 3 PLEATS DISPOSABLE BREATHING BAG (Latex & Latex Free)

Single use breathing bag made from quality neoprene material and thoroughly inspected to ensure the highest level of quality.

Features:

- Smooth surface
- Single use
- Comfortable grasp
- Completed with 22mm bushing
- Flexible

TEST LUNG (Latex Free)

Test lung is an ideal tool for demonstration / testing resuscitators, ventilators or others respiratory equipments prior to use.

Features:

- Foam filled
- Superior quality
- Exceptional grip

Part No
TL-750CC-GT-DT
TL-1L-GT-DT

RACINE CONNECTOR (Latex Free)

This connector allows movement of the breathing circuit at the patient end and eliminates the need for connectors of varying types and sizes. Quick and easy tube insertion will provide a firm and tight seal. Fits 7 to 10.5mm tubes.

Part No
RAC-001-01
