# About us

25th anniversary in 2020

Leading PCR reagent manufacturer in Europe

Trusted trademark in 110+ countries

Quickly growing range of products

60% revenue from diagnostic sector

Patents in EU, US and South Korea

ISO 9001 and ISO 13485 certified

Knowledge

Quality

Cooperation

Innovation

Reliable

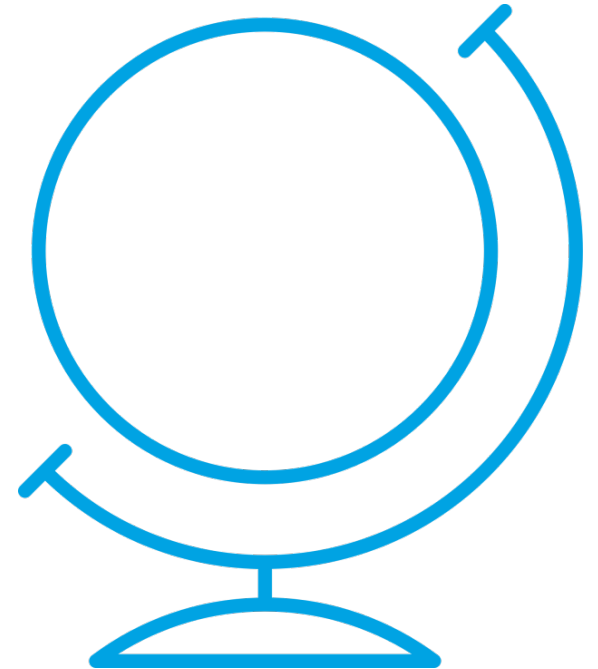

Responsible

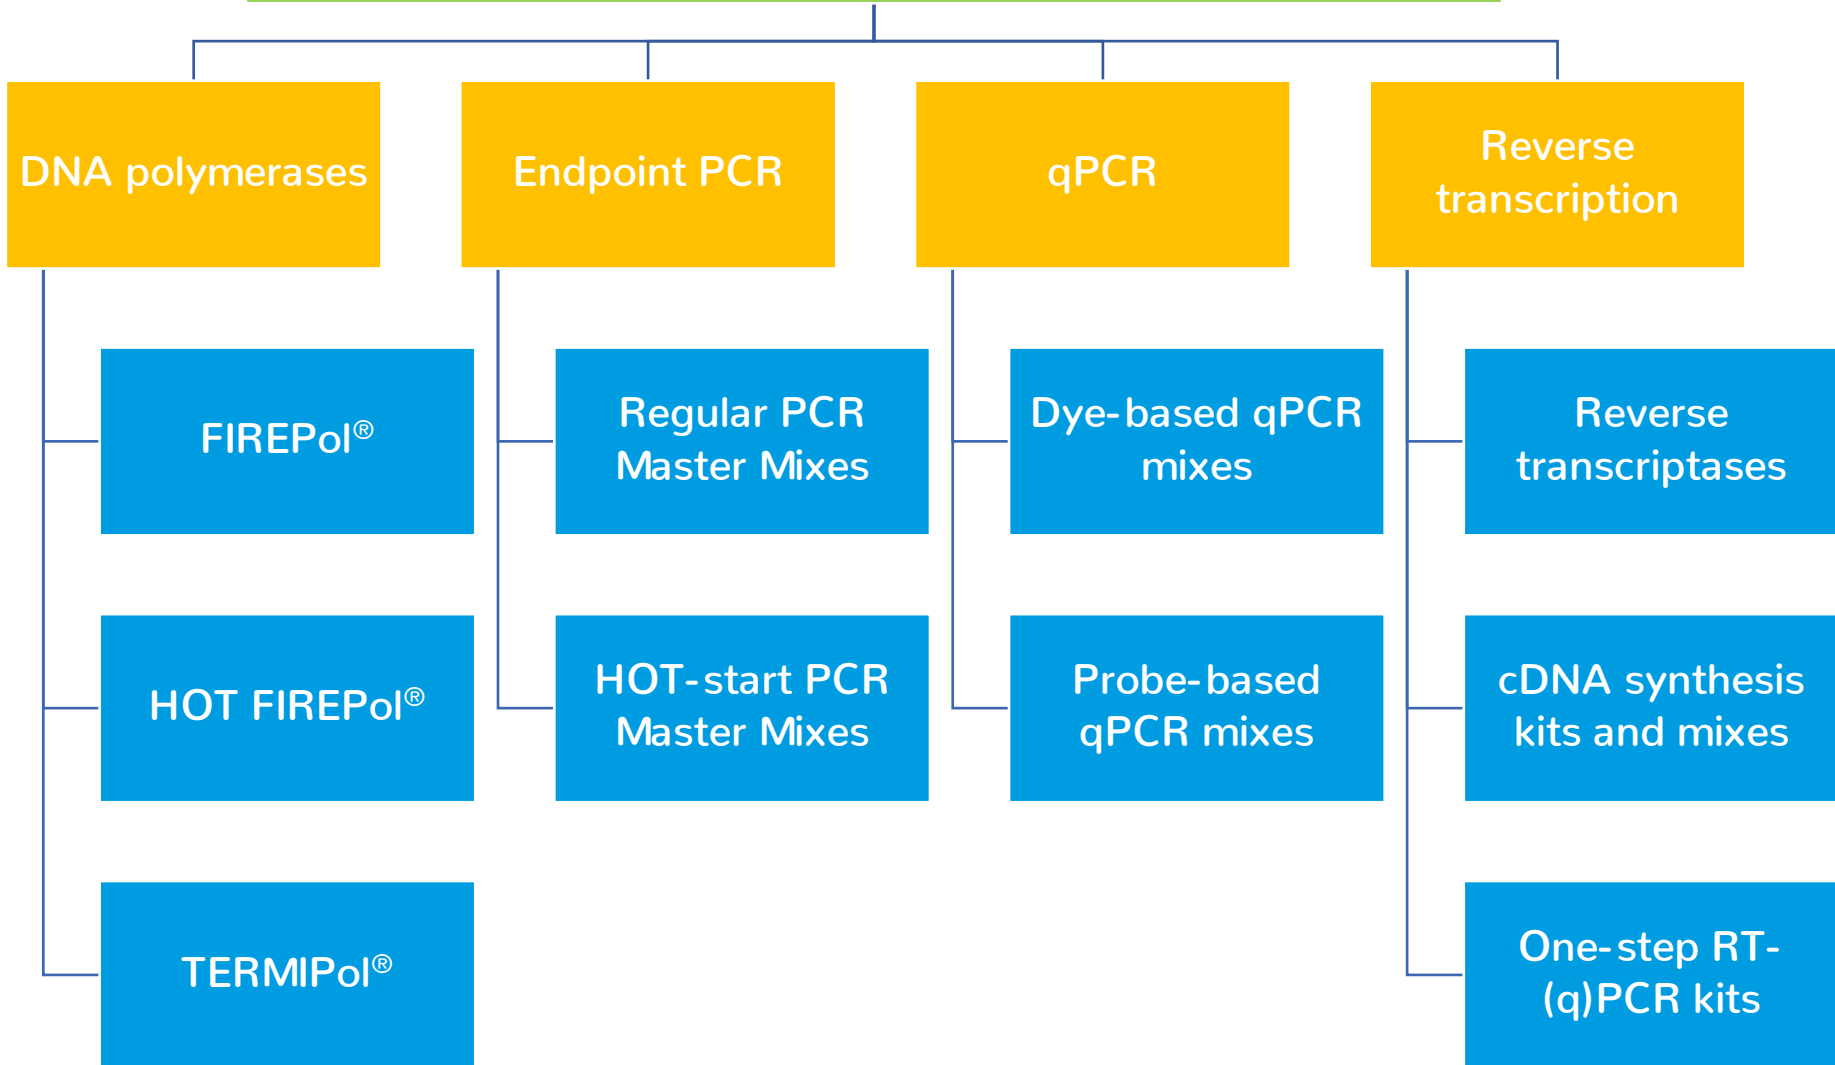

Unique know-how in  
designing & producing wide  
range of polypeptides stable  
at room temperature for  
extended time period

# Unique up to 30 days stability at room temperature

- **Stable enzymes + unique buffer composition**
  - **No dry ice needed** – not hazardous, less regulations
  - **Lower shipping costs** – shipped without bulky styrofoam boxes, heavy cold elements or dry ice
  - **Less waste** – cheaper waste management
  - **Reduced risk of damage** during handling
  - **Convenient** for the user – reaction set-up without ice
  - Ideal for fieldwork with **portable thermocyclers**
  - Great for **automated** and **high-throughput** PCR workflows

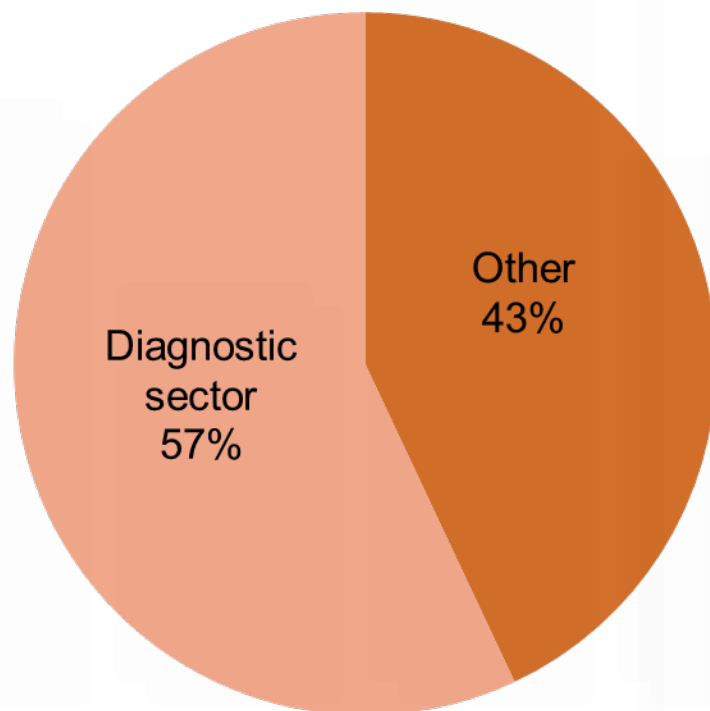

Solis BioDyne product portfolio  
all stable at room temperature for 30 days

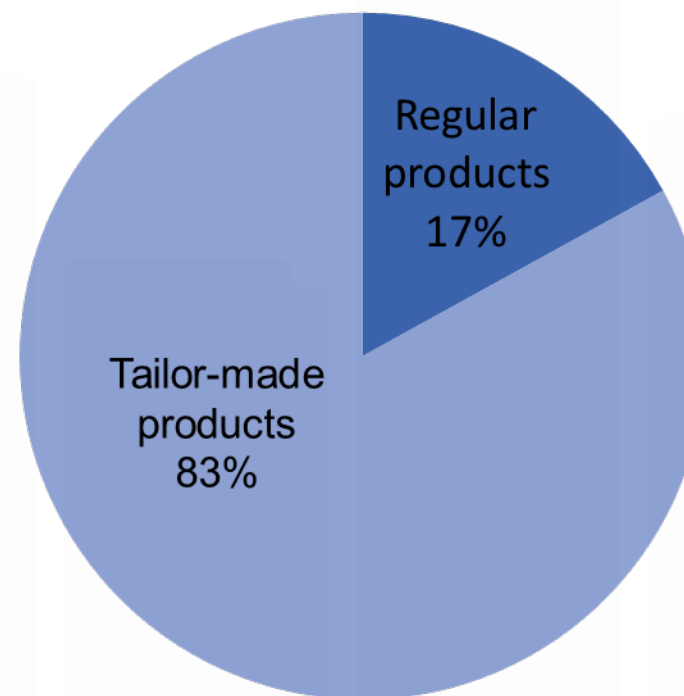

# Experienced in serving diagnostics

- Close co-operation to find the right product and protocol
- Dedicated scientific support available within 1 business day

## Sales by sector

## Sales to diagnostic sector

# Need to go Custom?

- If our traditional catalogue products do not meet your needs, we can offer:
  - Bulk product
  - Unique formulations
  - Custom product size and format to meet your specific requirements
  - Custom product design and R&D

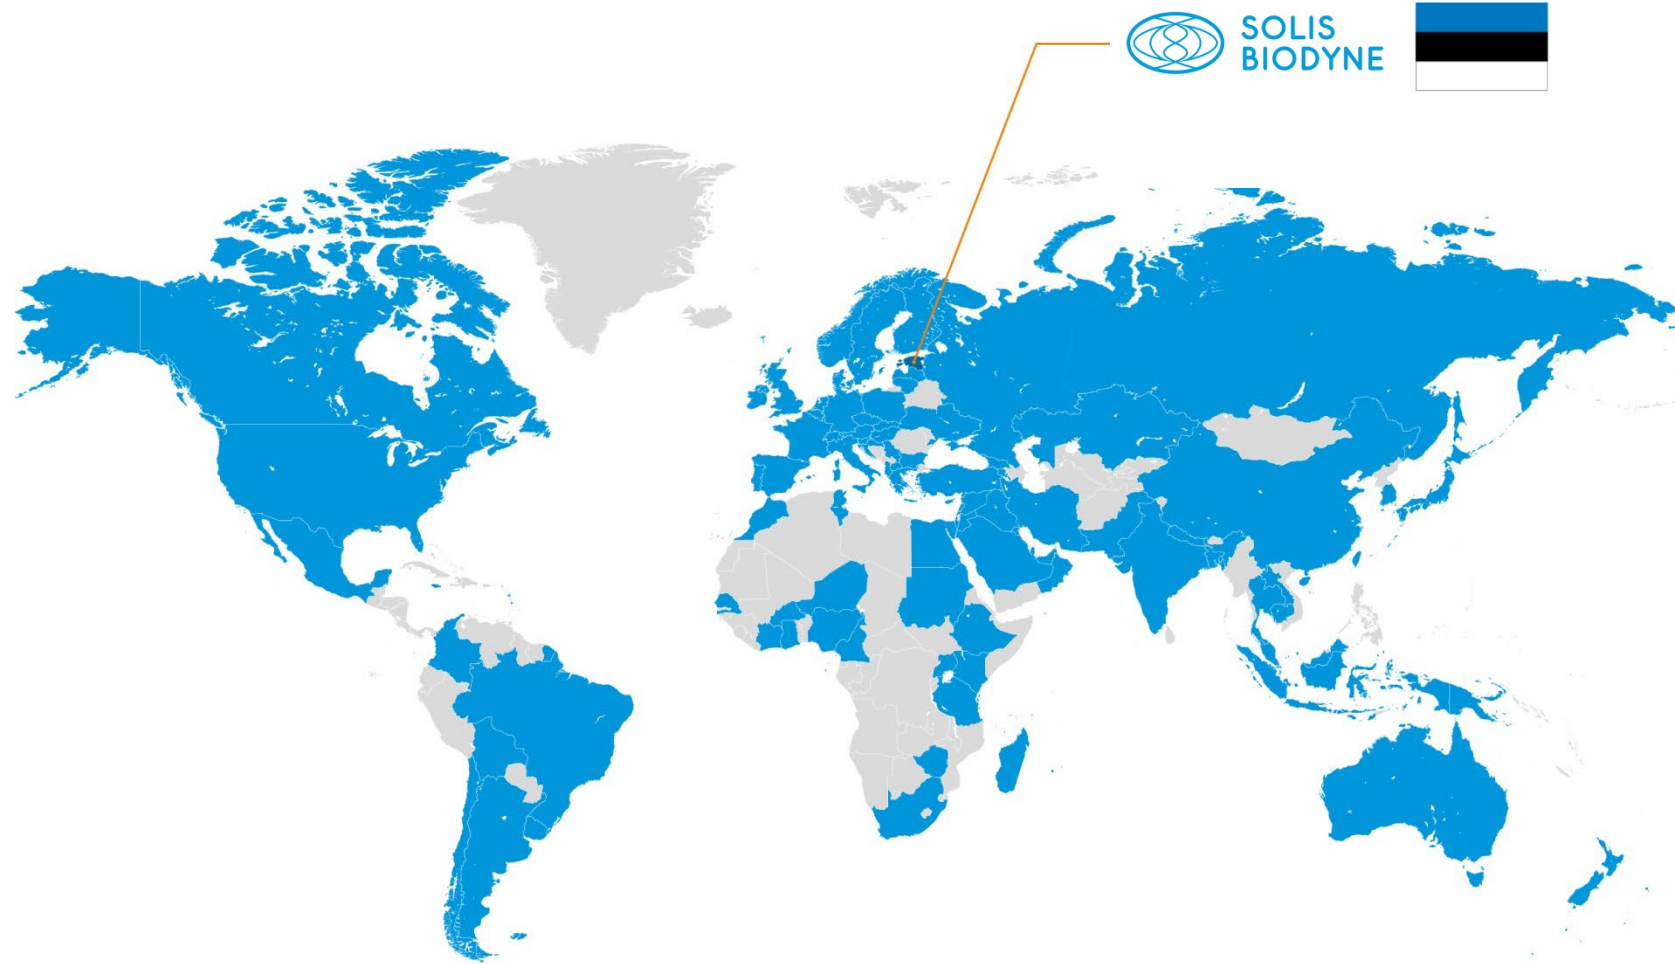

# Commitment to Quality

- Our products match the **high quality standards** of kit makers
- We follow **ISO 13485** and **ISO 9001** International Quality Standards to guarantee our clients **consistency** and **reproducibility** of our **products and services**
- We are **certified** and **audited regularly**
- Your order is **produced** and **delivered exactly the same way** every time
- Our quality policy allows you to be confident in our ability to manufacture the products and components **reproducibly lot-to-lot** and provide required documentation.

# Solis BioDyne worldwide presence

# Solis BioDyne and Covid-19

- Optimized product for the application
- Validated protocols on [US-CDC](#), [Berlin Charité](#) and [Pasteur](#) protocols
- Scaled up production and [abundant volumes available](#)
- Cov Kit is a [component of several CE-IVD marked Covid-19 kits](#). Examples: Diatheva (Italy), MultiplexDx (Slovakia)
- Typically 3-plex assays combining 2 targets and 1 control

SOLIS  
BIODYNE

Looking forward to  
our cooperation
