

## COLON-RECTAL STENT

Excellent conformability  
and flexibility

# GATE Colon – Rectal Stent

1 Uncovered Straight Type

2 Covered Flare Type

BEFORE |

• Mediwood

AFTER |

• Mediwood

3 Unique wire construction absorbs pressures

## ● Indication for Uncovered Stent

- For malignant colorectal obstruction

## ● Features

- Knitted construction with unfixed cells
- The weave rotates in both planes in different directions
- Low migration and shortening
- Excellent conformability and flexibility for placements in tortuous anatomies

## ● Indication for Covered Stent

- For benign and malignant colorectal obstruction

## ● Features

- High flexibility and low shortening with knitted construction
- Full silicone cover to prevent tissue ingrowth
- Flare on both ends to minimize migration
- Retrieval string on the distal end for stent removal

## ● Ordering Information

### Uncovered/Straight

Model Number	Delivery Device		Stent		Type	Straight/Flare
	Diameter (Fr/mm)	Length (mm)	Diameter (mm)	Length (cm)		
T1007-CB1804S	10/3.33	700	18	4	Uncovered	Straight
T1007-CB1812S				12		
T1007-CB2004S	10/3.33	700	20	4	Uncovered	Straight
T1007-CB2012S				12		
T1007-CB2204S	10/3.33	700	22	4	Uncovered	Straight
T1007-CB2212S				12		
T1022-CB1804S	10/3.33	2200	18	4	Uncovered	Straight
T1022-CB1812S				12		
T1022-CB2004S	10/3.33	2200	20	4	Uncovered	Straight
T1022-CB2012S				12		
T1022-CB2204S	10/3.33	2200	22	4	Uncovered	Straight
