

TECHHEIM CO., LTD.

Medical Imaging & PACS solution Provider

TECHHEIM

TECHHEIM CO., LTD.

TECHHEIM CO., LTD.

Since its foundation in 2000, TECHHEIM CO., LTD. has been a professional firm which develops and provides total solution of PACS with best quality and service and supplied more than 2,500 medical institutions in Korea and overseas (Japan & Vietnam).

We have three Business categories:

- 1) PACS Solution Development (Cloud & On-premises)
- 2) Teleradiology System Development & Service
- 3) AI Solution Development & Service

TECHHEIM has PACS development technology that complies with DICOM 3.0, which is the international standard for medical image and communication and a technology to acquire, send, store, and retrieve medical images. Also it supplies HL7 to communicate with OCS system. It provides various functions for image retrieving and processing on the On-premises as well as cloud solution to Public Healthcare center, Small & Medium Hospital and Institutes.

We are looking for regional partners who share our vision on world healthcare industries.
