UT70

A Modular Lower Body Protection for Multiple Applications

MAVIG
With the UT70, MAVIG has created a new generation of table mounted shields to offer flexibility with maximum protection. The modular design of the lower body protection: All components are interchangeable to give you the option to decide what amount of protection is needed and from which side of the table (possible mounting position: left or right).

The new large X-ray protective lower body table shield does not only protect the doctor, but the assistant as well. An accessory rail has been built into the shield to give the needed space for table and C-Arm controls, as well as other required equipment.

- Lower body X-ray protection with a lead equivalent of Pb 0.50 mm for all shields/panels
- Main shield (MS) can be combined individually with additional side shields and upper shields, up to max. 1620 mm width
- Available for the following table profile rails: 7.7 x 25 mm (GE), 9 x 25 mm (Toshiba/Canon) und 10 x 25 mm (Philips/Siemens)
  -> Please notice the minimum length of the table rail of 600 mm for a proper installation of the UT70.
- Additional front accessory rail to match your table profile rail
- Optional wall mounts for storage

**Standard-/Example Configuration**

**UT70 (Standard: recommended minimum protection)**
- Total width: up to 1410 mm
- Two overlapping, flexible X-ray protective shields (main shield + wide side shield)
- One removable upper shield (wide)

**UT70 (Maximum of protective area)**
- Total width: up to 1620 mm
- Three overlapping, flexible X-ray protective shields (main shield + narrow side shield + wide side shield)
- Two removable upper shields (narrow + wide)

**UT70 Components**

The modular UT70 consists of the following components which can be combined individually. We are happy to assist.

---

**Lower Body Components**

- **Wide Side Shield**
- **Narrow Side Shield**
- **Main Shield** - Always use! (= minimal setup)

**Upper Parts**

- **Wide Upper Part**
- **Narrow Upper Part**
