

# AXION

**Outstanding balance of reliability, functionality,  
European quality and affordable price**

# Medical equipment manufacturers since 1970

50 years in the business  
of medical device design,  
development, manufacturing  
and sales

A quality management system  
compliant with ISO 9001:2015  
and ISO 13485:2016

A product range comprising over  
**25 products across 5 focus areas:**  
resuscitation, surgery, cardiology,  
neonatology, physiotherapy

# A seasoned player in international commerce

**Over 10 years of experience** handling overseas deliveries

A sales reach spanning **over 30 foreign countries**

Our 5 top-selling devices are **CE-marked** and 4 more are pending (anticipated certification deadlines – December 2020)

Well-coordinated logistics with customizable delivery options that will suit any customer

Convenient and flexible payment schemes: financial instruments negotiable

# A seasoned player in international commerce

# The benefits we offer our dealers

One-stop-shop principle:  
Personal customer care support will be provided by a **Client Case Manager available 24/7** to coordinate care that is safe, timely, effective, efficient, equitable, and client-centered.

You will have an opportunity to acquire **exclusivity rights** if you meet the terms and conditions of your dealership contracts and the targets specified in your shipments plan

You will be able to work **under a letter of credit or under an instalment plan** if you choose to enter into a perpetual dealership contract with us

We will help you prepare your specifications and product descriptions for participation in **tenders and public procurements**

We will provide you with a **wide range of product configurations** enabling you to meet the bidding requirements as closely as possible

We will offer you a reasonable trade-off between **reliability, functionality, and affordable price**

With our equipment you get a **2-year warranty** and we encourage you to expect a service life of over 5 years

Our defects and product returns statistics are remarkably low (**less than 1 %**).

# Directions of medical equipment production

Resuscitation

Cardiology

Neonatology

Surgery

# Medical resuscitation equipment

## DKI-N-11 «AXION»

- Operating modes: manual and automatic modes of defibrillation, cardioversion, monitoring mode, cardiac pacing, SpO2, ECG, NIBP
- Applicable for adults and children
- Included in the Ambulance Team, Hospitals, Cardiological Dispensaries and Medical and Obstetric Centers Equipment Standard.
