### Our products and solutions

Enterosgel — OTC medical product, innovative oral intestinal adsorbent (enterosorbent) that helps eliminate toxins, allergens and pathogens from the body.

Enterosgel is used for treating atopic dermatitis, psoriasis, diarrhoea of various origin, food poisoning and alcohol intoxication.

100 g of the product contain active ingredient - polymethylsiloxane polyhydrate 70 g (organic silica), excipient - purified water 30 g.

### Our value proposition

Enterosgel – #1 on the Russian & CIS intestinal adsorbent market (*DSM Group*).

Enterosgel can be used by:

- Pregnant and breastfeeding women
- Infants and children (0+)
- Diabetes patients
- Allergy patients
- Patients with gastric ulcer and duodenal ulcer
- Vegans, vegetarians, etc.

Enterosgel does not contain substances that can cause allergic or toxic reactions.

Enterosgel is not metabolized, and does not penetrate into blood stream.

Over-the-counter medicine.

### Our track record and achievements

Enterosgel has been on the market for over 30 years.

Working at full capacity, the enterprise can produce up to 10 million Enterosgel packages annually.

Our clinical trials have been published in several high profile medical journals such as: British Medical Journal, Scientific Reports, Minerva.

Our company has established partnerships in 10 export countries, possesses 3 certifications (GMP-0114-000175/17, GMP-0114-000176/17, ISO9001:2015).
