

Together for the innovative medicine

P.P.U. Medbryt Sp. z o.o.
is a member of the MedSilesia –
National Key Cluster

medbryt®

COMPANY DESCRIPTION

Medbryt has been operating since 1991 and is a Polish producer and distributor of innovative aerosol therapy equipment. Thanks to the experienced team we create modern devices that suit our time and customers' expectations. We are present throughout Poland thanks to trusted agents and a modern online store. In our assortment you will find a wide selection of inhalers and inhalation accessories. We provide complex inhalation equipment to hospitals, sanatoriums, rehabilitation centers and private therapeutic rooms. We design and make functional inhalation stations that effectively clean treatment rooms from unnecessary aerosol, reducing equipment wear. We also run a fast and efficient service for our customers throughout the country. We offer training and workshops concerning selection and use of inhalation equipment. We have a Quality System certified by TÜV Rheinland, which guarantees the highest quality of our products. Our experienced team offers professional service and support.

COMPANY OFFER

In recent years we have developed inhalers such as:

MARIN – interactive (cooperating with patient) pneumatic inhaler with ability of creating vibroaerosol and with the unique function of generating aerosol only during the patient's inspiration, which allows enormous drug saving and significantly increases the effectiveness of therapy. Marin is the winner of a silver medal at the International Exhibition of Invention LEPINE in France.

MARIN MP3

P.P.U. Medbryt Sp. z o.o. is a participant of the „MedSilesia Go Global” project, its main objective is to improve the competitiveness of Polish medical products and technologies through the growth of internationalisation of enterprises operating within the framework of the MedSilesia Cluster.

MONSUN – efficient and durable pneumatic inhaler with ability of producing vibroaerosol – a simplified version of the MARIN inhaler.

TAJFUN – ultrasonic inhaler with ability of thermoaerosol and vibroaerosol production. Winner of the gold medal at the world exhibition of innovation, research and new technology EUREKA in Brussels.

The MEDBRYT company's mission is to provide customers with the highest quality equipment and services, which is why for many years we have represented in Poland an Italian company Flaem Nuova – manufacturer of top-class inhalers; a French company DTF – manufacturer of unique otolaryngological inhaler and other valued companies dealing with the topic of inhalation.
