

# Atlas Latex Kits

Atlas Medical Latex kits offer a quick and simple assay to diagnose a range of pathogens and medical conditions. The assay is based on an immunological reaction between the detected analyte in the sample and its corresponding antibody or antigen already coated on latex particles

## Features:

- 🔄 Convenient & easy to use slide test.
- 🔄 No special instruments are needed.
- 🔄 Clear and Visible agglutination for doubt-free results.
- 🔄 kits come in convenient sizes of 50 or 100 tests & include reagents, controls, disposable stirrers & test slides.

## Atlas Product Range:

- 🔄 Serology: CRP, ASO, RF & IM.
- 🔄 Microbiology: Staphylococcus, Streptococcus (Groups A, B, C, D, F & G) and Salmonella.
- 🔄 Pregnancy: Monoclonal direct.
- 🔄 In addition to latex tests, Atlas Medical offers: TPHA, RPR & Sickle cell kits.

All kits are also available in OEM/private label format.
