

## Robust, Elegant, Innovative Factory Automation

### Assembly Lines and Robotics

REI Automation, Inc. specializes in designing and building custom industrial equipment, including assembly lines, robotic cells and special-purpose machines. Our consistent goal is to build elegant, robust systems that provide unmatched value for our customers.

Our reputation in the industry is one of innovation and teamwork. Our customers are experts in their products and processes; REI's employees bring our vast experience with industrial automation and design creativity to the table. REI is proud of its in-house staff of highly experienced engineers and technicians who enjoy this creative collaboration to develop great machine systems.

REI has integrated systems for the automotive, medical, nuclear, heavy vehicle, communications, energy, and consumer goods markets.
