

Our OEM services

Agilent Technologies has built its reputation on innovation, expertise in engineering, knowledge and collaboration to bring unmatched, robust scientific solutions to a wide range of markets. With the acquisition of Dako and its comprehensive product portfolio within Specific Proteins and Flow Cytometry, Agilent Technologies will continue to raise the standards within diagnostics

Our OEM business has established lasting partnerships worldwide with partnering companies, ranging from large multinationals to smaller manufacturers and commercial laboratories specializing in the fields of diagnostics, biotechnology and pharmaceuticals. Our history is built on more than 45 years of experience in developing and manufacturing multiple products for our OEM partners worldwide.

We are represented by a global sales force that offers excellent customer service standards to our OEM partners. Projects are coordinated by experienced key account management teams thus providing smooth planning and timely completion. We are dedicated to providing scientific advancement, certainty and building lasting partnerships with our customers.

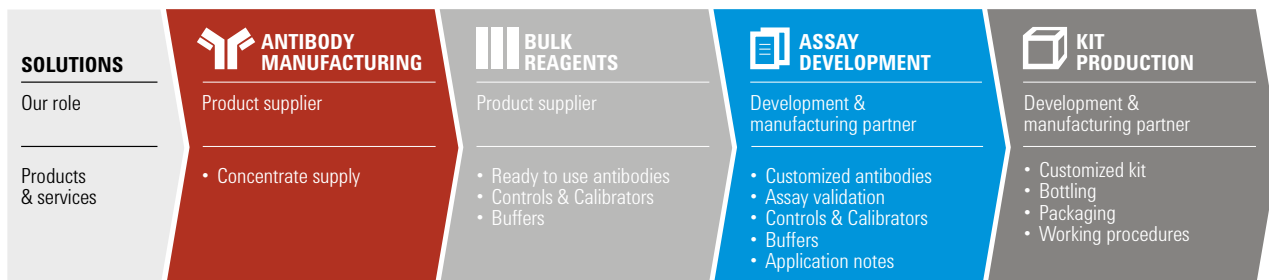

Our vision

“We want to be the preferred manufacturer of antibodies for IVD laboratories and IVD manufacturers to deliver the highest standard and accuracy in diagnostics of cancer, cardiovascular and kidney diseases”.

One Stop Shop

As your OEM partner we offer you a one-stop-shop service by covering the entire value chain from antibody bulk manufacturing through assay development to filled and labeled enduser products. Based on the level of interaction with our OEM partners and the complexity of the project, we play different

roles ranging from being a product supplier to a development and manufacturing partner. By choosing us as your partner, you can rely on us to offer high-quality scientific solutions from a dedicated team with detailed knowledge of a variety of platforms and products.

Our strengths in the OEM field include:

- From antibody bulk manufacturing to complete assay development and kit manufacturing
- Extensive experience from diversified OEM collaborations globally
- Technical skills within immunoassay development
- Capacity to adapt to multiple platforms
- Seamless quality systems and regulatory compliance
- Customer focused support and services

Products

- Monoclonal antibodies
- Polyclonal antibodies
- Conjugated antibodies
- Turbidimetry & nephelometry assays
- Controls, calibrators & buffers
- Chromogens & substrates
