

# Sterilization Wrap

## Berry is your global supplier for barrier and filtration solutions for sterilization wraps, providing regional manufacturing capabilities and local expertise

Our nonwoven materials are manufactured using state-of-the-art technology designed to provide the necessary strength and tear resistance, while delivering the optimal barrier protection needed to meet the critical requirements of today's healthcare environment.

### Features

- Complies with regulatory standard EN 868-2
- Solutions offering up to 97% Bacterial Filtration Efficiency, three times more than cotton\*
- Fabric barrier properties help minimize particles
- Steam or Ethylene Oxide Sterilizable (EtO)
- Wide range of materials, basis weights, colors, treatments, derivatives, and finishing options satisfying different needs
- Multiple weights offer the appropriate strength required for different applications
- Additional solutions for sterile components: tray liners, transport wraps, and dry transport wraps

\* Based on Nelson lab testing 2011, 2016 45gsm SMS

**Optimal solutions for the most demanding and critical applications**

# Our patented materials **help** protect against Hospital Acquired Infections (HAI)
