

# CompactCath

## PRE-LUBRICATED INTERMITTENT CATHETER

### Safety comes first

We are taking special care about our products' safety with respect to our users' health. This is why we make our catheters from PVC - medical grade, free from aggressive softening agent phthalates and also free from latex.

### Simple and easy handling

CompactCath is ready to use and easy to handle - helps enhance user convenience and comfort upon insertion and removal because is already pre-lubricated with gel.

### Hygienic - helps protect your health

No-touch strip helps in reducing the risk of infection which may be the result of tube contamination when touching it. Catheter comes in a single sterile packaging.

### Smooth eyelets

Smooth polished eyelets on the pre-lubricated catheter tip increase comfort during urine drainage and upon insertion and removal of the catheter.

### Compatibility

CompactCath has easy grip-funnel that connects with all common urine bags.
