

Biosan Ltd and Biolabmix Ltd
www.biosan-nsk.ru, www.biolabmix.ru

**Reagents and Kits for Molecular
Biology and PCR**

Our mission

**Creating comfortable conditions for
researchers and diagnosticians**

Our goal

**Provide our customers more efficient
tools for nucleic acids studies.**

Our qualified staff possesses a deep professional understanding of the characteristics of DNA and RNA and provides various, accommodated, economical products.

Our products

are the implementation of what is necessary
for efficient nucleic acids research:

Basic enzymes –
polymerases,
UDG, PNK, Ligase

Standard and modified
NTPs and dNTPs
for nucleic acids synthesis,
labelling, sequencing

Reagents for nucleic
acids isolation and
purification

PCR MasterMixes
and Kits

DNA Ladders

Standard and novel
oligonucleotides

Kits for
DNA Labelling

Professional services in design
of PCR kits and mastermixes, NA
Isolation and Purification, Reverse
Transcription and PCR

Optimized and tested Kits and ready Mixes for various PCR applications

**Reverse
Transcription**

**Reverse
Transcription/PCR
(one-step and
two-step methods)**

**Conventional
PCR**

Hot-start PCR

qPCR

**High-throughput
PCR**

**Multiplex
PCR**

Genotyping

**Long-Range and
Complex Templates
PCR**

**Generation of PCR
products for
TA cloning**

Our advantages

**Extreme
adaptability**

**More than
25 years
of experience**

**Product quality -
risk reduction**

**Continuous
accessibility,
continuous contact
with customers**

**Professionalism
and competence -
with design
experience**
