

# BP Monitor + Pulse Oximeter

**NEW**

Combo-100 Wrist-type monitor is an easy to operate in compact design. With this handheld monitor, you can easily measure your Blood Pressure (mm Hg), Pulse Rate (bpm) and Arterial Blood Oxygen Saturation (SpO2 %) Simultaneously.

SpO2 measurements/ Percutaneous arterial oxygen saturation levels

Pulse rate measurements/ Pulse rate is measured through the fingertips at the same time that SpO2 measurements are taken

Displays a variety of warnings on the monitor

Measurement data recorded on microSD cards

Blood pressure measurements/ Devices body is wrapped around wrist to measure Systolic and Diastolic blood pressure

Easy operation allows measurement results to be obtained promptly

Uses CAREOX®'s proprietary M-Cuff® technology

Uses two AAA alkaline (LR03) batteries

## Making measurement simple. Compact device with convenient Patient Data Management

Compact and lightweight body reduces stress on the patients and does not get in the way of treatment or other equipment. Attached only to the wrist and fingertip, measurements can be taken immediately with a choice between continuous readings for data to be recorded or one time event measurement. Measurement data can be stored on the included microSD card and managed and analyzed using application software on a PC.

## Utilizes M-Cuff®. Delivers remarkable precision and quality.

CAREOX®'s patented technology "M-Cuff" is used for the cuff that is wrapped around the wrist, covering the arteries with reliability to accurately detect the pulse signals. CAREOX® has been making best efforts in the developing and manufacturing of highly accurate Blood Pressure and SpO2 Monitors and has achieved high acclaim throughout the world for its precision and reliability.
