

## Superior Skin Sensor Technology

I-Medex specializes in the design and manufacture of electrode sensor technology for the body. Our products are designed to superior specifications with significant background noise elimination and improved water resistance.

All sensors are designed to eliminate interfering electromagnetic noise.

### COMPANY INFO:

I-Medex Co, LTD

1504 -6 Unayacho Hanamaigawa – ku,  
Chiba-shi, Chiba 262-0003, Japan

Tel: +81-43-257-7411

Founder: Makoto Ichida

Established: 1992

Capital: ¥12,500,000

Employees: 75

## Company Timeline

**2015**

DEVELOPED REUSABLE “MY RODE R+” FOR HEALTHCARE APPLICATIONS

**2013**

DEVELOPED “MY RODE LIGHT” FOR HEALTHCARE.

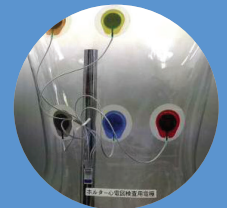

**2012**

DEVELOPED “MY RODE” ELECTRODE SERIES FOR WEARABLE SENSORS

**2005**

DEVELOPED THE WORLD'S 1ST WATERPROOF ELECTRODE

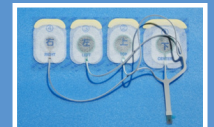

**2004**

AUTOMATED WATER RESISTANT GEL PRODUCTION

**2002**

I-MEDEX DEVELOPS THE WORLD'S FIRST HORTA ELECTROCARDIOGRAM ELECTRODE

**1995**

AUTOMATED PRODUCT OF THE ECG PRODUCT

RECEIVED KURARE COMPANY GRANT

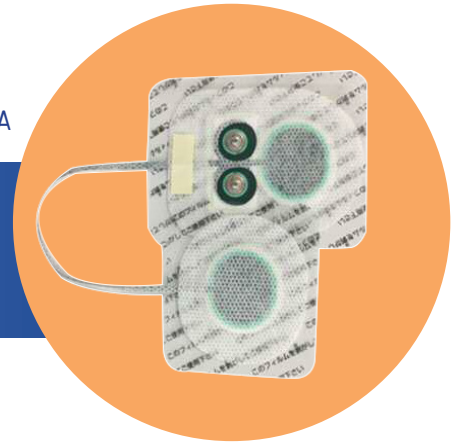

INITIATED PRODUCTION OF WATER RESISTANT GEL

**1994**

PRODUCT MANUFACTURING BEGINS

**1992**

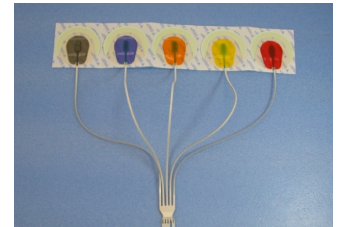

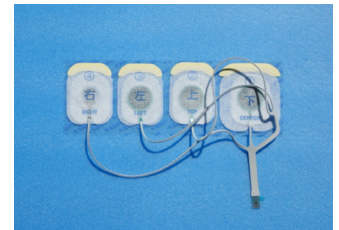

COMPANY ESTABLISHED

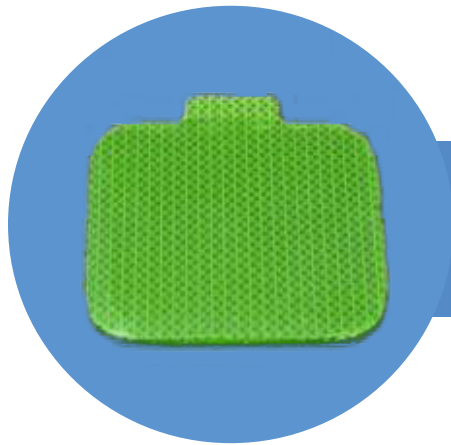

## The I-Medex Advantage:

### MANUFACTURING END-END CAPABILITIES:

- All I-Medex products are manufactured in-house to client specifications. We have the ability to create a high-quality product in a timely manner and to the client's batch size specifications - from trial size to larger scale production.
- I-Medex is the only Japanese company that specializes in producing quality electrodes for medical use.
- Our design and development teams are subject matter Experts in Silver, Argentic chloride, Gel and Adhesives with our proprietary technology.

FOR THE HALTER ECG

I-MEDEX GEL PAD

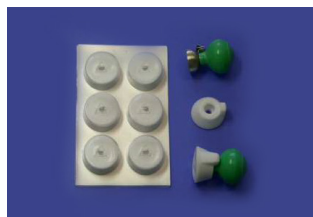

## I-Medex Proprietary Technology:

The product portfolio includes ECG, EEG and gel pads.

At I-Medex, our polymer science group specializes in superior gel and adhesive development.

Our technological know-how includes expertise in matrices, conductive materials and conformity. With a strong expertise in design, noise elimination and productivity, we have a strong reputation for developing superior products for use in healthcare, fitness and cosmetology applications.

All products undergo regulatory control and meet the ISO standards for QMS, GQP and GVP.

ECG (POLYURETHANE GEL)

ECG (ACRYLIC GEL)
